Business Analyst Training

About EnhanceLearn

EnhanceLearn offers you a complete career transition by providing training and placement programs for Students and Jobseekers looking for a Career Success. We provide best IT training and certification courses which is taken by professional certified experts. The training modules are designed as per the market requirement so that it helps student to conquer the Career Job Market and achieve their career goals with our placement assistance.

About the Business Analyst Training Course

EnhanceLearn is offering the definitive training in Business Analysis that can be taken by professionals and students to become a certified business analyst. As part of the training you will learn the necessary skills and knowledge in business analysis, manage the business processes, connect the business clients and technical teams, gather business requirements and provide the best solutions to business problems. You will work on real world projects and case studies to help you get hands-on experience. Get trained by EnhanceLearn to become a certified Business Analyst Professional.

Why Take Business Analyst Training Course?

The Business Analyst role will be one of the most important roles in deciphering the future for many businesses.

A Business Analyst acts as a bridge between business ideas and business capabilities; creating and scoping valuable changes and optimizations to business processes. Typically driven by conducting 'performance capability assessments', or 'feasibility studies', the Business Analyst regularly appraises business performance. Such reviews appraise capabilities ranging from those visible to the customer through to those embedded deep in the manufacturing process.

Business analyst career path can benefit you a highly rewarding and lucrative career. According to Glassdoor, business analysts make an average base salary of \$70,887 in the United States. The more specialized the role, the higher the salary.

EnhanceLearn is offering the industry-designed training in business analysis that can be taken by professional and students to master this domain. Business analyst play a pivotal role in any project and hence completion of EnhanceLearn certification training you can apply for the best jobs in the business analysis domain.

 - Investigative Approach
 - Iterative Approach
- Various methods for elicitation like
 - Interview
 - Focus groups
 - Requirements Meeting
 - JAD Session
 - Brainstorming
 - Observation
 - Survey
 - Prototype
 - Document Analysis
 - Business Rule Analysis
 - Reverse Engineering
 - Product Trails

Module 11: Requirements Analysis

- Need for Requirements Analysis
- Types of Requirements
- Value of Modeling Techniques in Analysis
 - Organization Model
 - Location Model
 - Process/flow Model
 - Use case Model
 - Data Model
 - State Model

- Business Rule Analysis
- Prioritizing Requirements
- Verifying and Validating Requirements

Module 12: Requirements Documentation

- Formal and Informal Documentation and the Level of Detail Required
- Writing for Usability and Comprehension
- Common Requirements Document Defects
- Components of a Formal Requirements Document
- Requirements Verification and Validation
- Requirements Sign-Off

Module 13: Business Process Modelling (Unified Modeling Language)

- Why Models are created?
- Objectives of Modeling
- What is Process Management
- Understanding Process Modeling
- AS-IS Vs. TO-BE Modeling
- Prototyping
- Unified Modeling Language
 - Structure Diagrams
 - Class
 - Component
 - Composite Structure
 - Deployment
 - Object and Package Diagrams
 - Behaviour Diagrams
 - Activity
 - State Machine
 - Use Case Diagrams
 - Interaction Overview Diagram
 - Communication
 - Interaction Overview
 - Sequence
 - Timing Diagrams

Module 14: Evaluating Business Solutions

- Evaluating the solution
- Measuring the performance of the solution
- Analysing performance metrics
- Characteristics of Good Requirements
- Risks associated with Requirements
- Types of Testing Approaches
- Creating a Test Plan
- Verified and Validated Requirements

Business Analyst Training

Module 15: Business Requirements Gathering Tool

- Rational Requisite Pro
- Enterprise Architect
- MS Visio

Module 16: Business Improvements

- Selection of Process teams and Leader
- Process Analysis Training
- Process Analysis Interview
- Process Documentation
- Review Cycle
- Problem Analysis

Module 17: Additional Concepts

- Requirement Traceability Matrix
- Change Request Management
- Configuration Management
- Process Re-modelling
- Version Controlling
- Contracts
- Architectures
- Standards/Compliance
- Governance Risk Management and Compliance (GRC)
